Subject: RE: Kennecott SWMP Characterization Samples

Hey Mary,

Yes, to confirm, in the event that KEMC is unable to complete the storm water characterization study within the 6-month time frame due to weather, KEMC will be granted additional time to complete the study. We are aware that this may be necessary since the study was recently approved, and winter is fast approaching, therefore conditions may not be conducive to sampling.

Therefore if, towards the end of the 6-month time frame, KEMC is unable to complete the study, please simply notify me by email or in writing and we will grant an extension.

Please contact me if you have further questions.

Thanks.

Linds

Subject: Kennecott SWMP Characterization Samples

Hi Lindsey,

As a follow up to our phone conversation could you please confirm our time limit for our storm water characterisation sampling. Mostly, I need confirmation that in the event that we are unable to obtain the storm water samples within the 6 month time frame we have been allotted (due to weather conditions and the high likelihood that the snow cover on the ground will not be melted within the time frame) that we will be allowed a reasonable extension period to complete this.

Thanks,

Mary Morissette
